Agile

EXPERIENCE

Junior Backend Software developer, remote, Tanzania — 05.2023 - 10.2023

- Assisted in the development and maintenance of server-side logic, ensuring performance and scalability in Node/Express servers
- Contributed in database management and schema design, using MySQL and Sequelize to ensure efficient data storage and retrieval
- Actively participated in the integration of RESTful APIs within an MVSC architecture
- Engaged in continuous learning and application of best practices in code quality, security measures, and software design patterns, under the guidance of senior developers
- Supported team efforts in troubleshooting and debugging backend issues

Junior Fullstack Software developer, Spark Networks, Berlin, Germany — 02.2022 - 02.2023

- Collaborating in a cross-functional agile team
- Worked with frontend frameworks and libraries like React.js and Next.js
- Followed atomic design principles
- Identified and resolved client bugs using Sentry, improving overall application stability
- Maintained projects with technologies like Svelte, PHP, and WordPress
- Developed responsive email templates for marketing using Liquid and Braze, streamlining development time by 8%
- Developed a custom solution for migration of the employee database by 20% with the MERN stack and Docker

Intern Frontend developer, HUB Energy UK, Preston, UK — 08.2020 - 02.2021

- Used Git and Gitlab to manage code and collaborate with other team members
- Supported quality assurance by implementing unit and integration tests using Jest and React Testing Library
- Assisted in the development and maintenance of responsive web pages, using React, with Bootstrap and HTML5
- Implemented responsive design principles to ensure compatibility across various devices and browsers

PROJECTS

feedio.app — 04.2023 - present

- Planned and developed Feedio, a micro SaaS solution for feedback and reviews
- Preparing for an official launch on Product Hunt
- Integrated a customisable landing page and interactive widgets
- Integrated analytic features; Sentiment analysis, analytics on trends, and review distribution
- Working with noSQL databases (MongoDB)
- Working with frontend libraries and tools like React, React-router-dom, Axios, MUI
- Working with backend libraries and tools like Node/Express, Bcrypt, JWT, ODM (Mongoose) Stripe API, Docker

EDUCATION

Le Wagon | London, UK - 2019

Software development boot camp

UNED University| Online - Madrid, Spain - 2015/2016

Coursework in Clinical Psychology

Zaragoza University | Zaragoza, Spain - 2009/2011

Coursework in Telecom engineering, electrical engineering
